“ Thank You for extending financial help for our European trip this summer. We traveled to Italy, Slovenia, and Austria. It was an amazing! The team had an amazing cultural experience, improved team chemistry and trained and competed internationally. Additionally, we are excited about this season. We play an extremely tough pre-conference schedule, but we are confident that win or lose, the schedule will help prepare us for ACC competition and post-season tournaments. We believe in playing the best so that we can meet adversity head on and learn to work through the tough points. We will have a great combination of depth, experience, and athleticism. -Chris Poole

### IMPACT:

The international trip was funded through contributions to the Coaches Club. We would like to travel internationally once every four years (as regulated by the NCAA) to provide this experience to our student athletes.

### FUTURE IMPACT:

1. Whoop Bands for each student athlete who wear them 24/7/365. It measures strain and recover for their body. This information helps us to prepare practices and monitor the players to reduce injuries and fatigue. Hardware and monitoring costs approx. \$5000 per year.
2. Volleymetrics - A stats and scouting program costs approx. \$10,000 per year.
3. Vision Training - Volleyball is a high speed sport and we use vision training to pick up the ball quickly and ability to train the blockers to pick up cues from the setters and react at the net. This system costs approx. \$6000 per year.
